Live Interactive Virtual Explorations (LIVE)

From the southern California coast to the inland valleys, to the mountains, and even to the stars

HPWREN LIVE is a pilot activity within the National Science Foundation’s HPWREN project which focuses on bringing real time events occurring in hard-to-reach areas to students of all ages via wireless Internet connections. Interpreters such as scientists and park rangers are available at the remote site to interact with the LIVE participants. The primary objectives of HPWREN LIVE are:

- Exploration and understanding of hard-to-reach science sites
- Preparation for field trips to remote areas

Requirements:
Internet connection, computer laptop, microphone, web camera, and speakers
