 TECHNO-ECOLGY

UCSD supercomputer lets scientists study life at SDSU’s Santa Margarita Ecological Reserve from afar.

“Values that allow the use of technology such as this...”

RESERVE

Technology helps studies yield more knowledge, SDSU official says.

“...– and target areas that require additional research, like the Santa Mariga...”

SYNCHRONIZED TIMES

More than science

The Santa Margarita Ecological Reserve is a vital sanctuary for a variety of wildfowl, as well as a gathering point for a diverse array of flora and fauna. The Reserve’s mission is to conserve and study these natural resources, and to educate the public about the importance of preserving them.

The Reserve is open to the public, and visitors are encouraged to explore the trails and enjoy the beautiful scenery.

More information about the Santa Margarita Ecological Reserve can be found on their website: [Link to website]
